Announcing EarthStation Satellite Controller

Broadcast satellite acquisition automation solution

Dallas, January 29, 2011 — Pikolo Data System, Inc announced the release of EarthStation, a satellite automation solution for broadcasters, government, and corporate operations. EarthStation is a collaboration of Pikolo Data Systems, Inc – the maker of multiple broadcast workflow solutions and Image Communications, LLC – the maker of CompuSat satellite automation systems.

EarthStation provides facilities with a solution to totally automate their satellite feed acquisitions while providing an interface that is easy to use but powerful.

No Software to Install

Whether on a Mac or PC, engineers/staff can quickly check feed status, make quick modifications – all via a secure web browsers interface. Mobile users can now schedule their own feeds while on assignment.

About Pikolo Data Systems, Inc

Founded in 2001, Pikolo Data Systems has been providing workflow automation solutions with an emphasis in the broadcast industry. The company offers a wide range of products and services designed to make organizations more efficient by empowering their staff.
